### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION*****Election/Restrictions***

This application contains claims directed to the following patentable distinct species of the claimed invention:

Species	Claims	Figures
I	1-6	3
II	7-12	4
III	13-18	5

Applicant elected specie I, claims 1-6 with traverse on September 28, 2004.

Claims 7-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The operations of "a multiplication node" and "an arithmetic node" are clearly defined in the specification.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Dacus et al. (6,081,161).

Dacus et al. (Figs. 11, 12) disclose an amplifier circuit comprising: an amplifier (102) coupled between the power supply (54) and ground, including a current detector (58); a signal detector (210) can be read as a voltage detector connected to the output of the amplifier (102); a matching circuit (138/150) shown in Figures 8 and 9 connected to the amplifier output; a load (R23) shown in Figure 13; and a subtractor can be read as an analyzer received signals from the detectors (58, 210) and generate an output; wherein AMP and an INTEGRATOR can be read as a gain control receiving the subtractor output and electrically connected to the amplifier (102).

***Allowable Subject Matter***

Claims 3-6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 3-6 call for, among others, a multiplication node a multiplication node an arithmetic node having the claimed functions.

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional reference (Agahi-Kesheh (6,430,402)) shows further analogous prior art circuitry.

This art is deemed relevant and should be carefully reviews before any amendment is filed.
